

# Assembly Flexible guide post

## What is A.F.G.P.?

Flexible guideposts are installed to support road surface signs where the danger of traffic accidents is high and special attention from drivers is required. The guideposts spatially divide traffic flow in the forward and reverse directions, and catch drivers' eyes to warn of dangerous areas.

## Key Features

1. Easy to replace the guide post with ease.
2. Save maintenance cost as replacement.
3. Bottom base past lasts permanently.
4. Easy to assemble and disassemble.

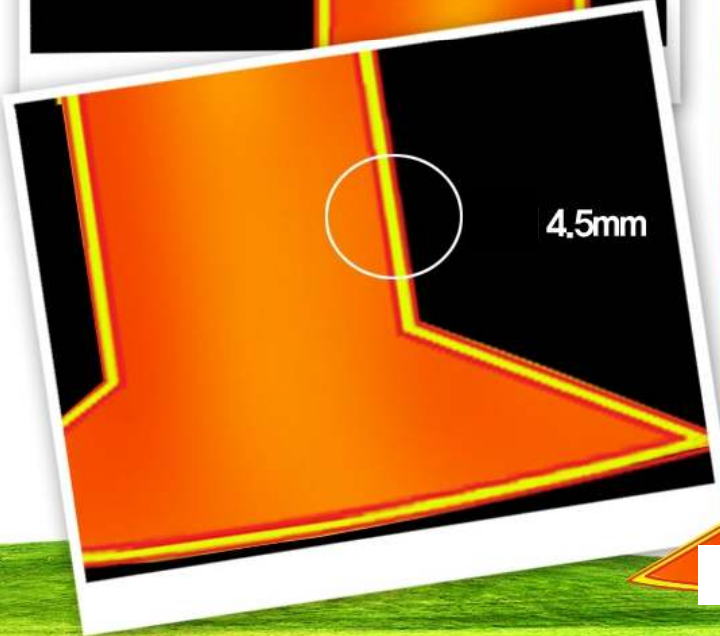

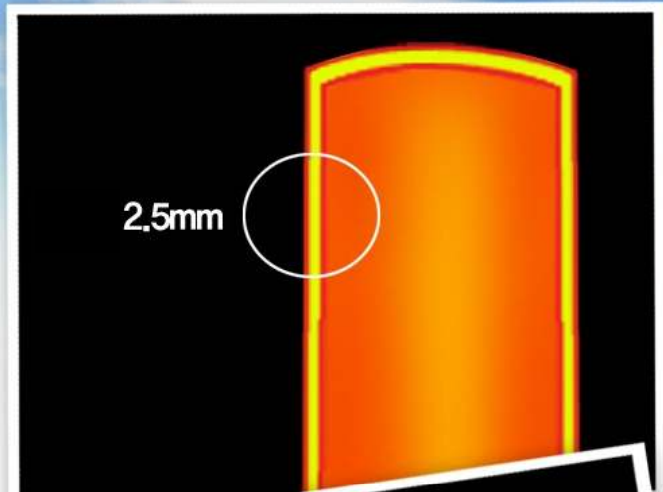

**Q** Is the post easy to disassemble from base?

We have tested if the post is disassembled from Base. As a result of test, it is not disassembled even if pulled by truck

**Q** Is it weak if assembled by hand?

Cover ring has 2 hole so it is fixed by screw driver with ease as well as easy to disassemble by screw driver.

# Assembly Procedure

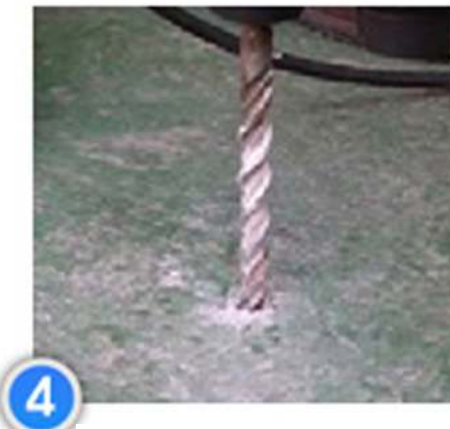

Insert post on the base

Cover the ring

Fasten the ring to fix

Drilling ground

Insert the screw

Fasten the Screw
