

SHINDO CAR STOPPER

Detail of Shindo Car Stopper

Shindo Car Stopper is not broken when damaged by vehicle and strong impact under -40 and +80 degree due to special material which is different from existing PE Car Stopper. Inserted PC reflector is not also broken and detached from Car stopper.

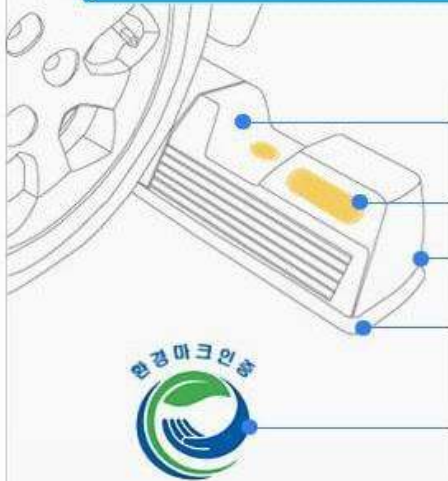

It resists vehicle's impact since Car Stopper Screw is fixed deeply on the ground.

Normal Car Stopper

Shindo Car Stopper

Key Features

1. Shindo Car Stopper is stable and sturdy because its surface is large and the top surface is rugged.
2. High-class, stylish design
3. The anchor assembly parts are lowered for easy assembly work.
4. The anchor head is closely attached to the bottom surface, which is very solid.
5. The PP Reflectors are rugged and do not damage tires
